Patent Attorney Randy McCarthy for IP Watchdog - Synthesis versus Innovation: A Practical Guide to protecting IP When Using AI Technology

Current artificial intelligence (AI) systems can generate an astonishing variety of content, including text-based works, audio, video, images, programming code, product designs, technical papers, etc. In many cases, the output from an AI system is virtually indistinguishable from that of a human. This trend is expected to continue at an ever-increasing rate in the coming years.
