

Tax Planning & Structuring

We provide advice on a broad range of unique tax issues, including the choice of entity to use in forming a business or venture; the structuring of mergers, acquisitions and liquidations of public and private companies; the drafting of partnership or LLC operating agreements with special tax allocations and other provisions; the implementation of real estate and equipment like-kind exchanges and the resolution of IRS and state income rulings, tax audits and appeals. We help international and domestic clients to evaluate and execute cross border, foreign investments and assist others in obtaining non-profit tax exempt status.
