HALL ESTILL
ATTORNEYS AT LAW

Aviation & Aerospace

Hall Estill attorneys represent clients in the Aviation and Aerospace industry, including owners and operators of aircraft, manufacturers and maintenance facilities, financial institutions and municipalities. Our experience in this area includes commercial litigation, airplane acquisitions, sales and financing, licensing agreements, as well as business and regulatory matters. Our attorneys also provide escrow services to help facilitate aircraft transactions.

Our multidisciplined approach also includes guidance on common operational issues to any business, including contracts, insurance, intellectual property, real estate and labor and employment.

Specific litigation cases our attorneys have handled include wrongful death and airport security, among others. Further, one Aviation and Aerospace team member was stationed at Lockheed Martin for a year and also litigated an airport security case to the Tenth Circuit Court of Appeals.
